PROFESSIONAL SUMMARY

AI/ML and Full-Stack Developerwith hands-on experience building agentic AI, multimodal AI, computer vision, and intelligent web applications. Experienced in developing multi-agent systems using LLMs, RAG, LangGraph, FastAPI, and Gemini, along with computer vision solutions using YOLO. Strong foundation in Python, JavaScript, React, SQL, PostgreSQL, REST APIs, and algorithmic problem solving. Experienced in building real-world, hackathon-oriented solutions involving event reconstruction, AI voice assistants, recruitment automation, fault diagnosis, and intelligent scheduling. Passionate about developing practical AI systems that combine intelligent reasoning with scalable software engineering.

TECHNICAL SKILLS

ProgrammingLanguages: Python
ML/DL: Feature Engineering, EfficientNetV2-L, YOLO11s
LLMs & AI Agents: LLMs, Prompt Engineering, Retrieval-Augmented Generation (RAG), Multi-Agent Systems, AI Agents, Tool/API Calling, Agentic Workflows, Voice AI
Computer Vision: CLIP, DINOv2, SAM, YOLO, OpenCV
Libraries & Tools: NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, EasyOCR
Web Technologies: React, Node.js, REST APIs, JavaScript, SQL, HTML, CSS
Databases: MySQL, MongoDB

EDUCATION

BachelorofTechnology,ArtificialIntelligence and Data Science 2024 - 2028
Sri Shakthi Institute of Engineering and Technology

- Cumulative GPA: 8.67 / 10

PROJECTS

MAIA — Multimodal AI Annotation 07/2025 - 10/2025

- Developed a multimodal annotation system that automatically converts images, videos, and audio into labeled datasets, using CLIP and DINOv2 for image understanding, SAM for frame-level video segmentation, and configurable audio labeling to generate datasets for supervised learning.

Tech Stack: CLIP, DINOv2, SAM, Computer Vision, Audio Processing, Automated Labeling

Makkal Hub — AI-Powered Municipal Complaint Management System 08/2026 - 08/2026

- Built an AI-powered municipal complaint platform that analyzes and prioritizes civic issues based on severity and community impact, reduces duplicate complaints through issue aggregation, and enables citizen-verified resolution tracking.

Tech Stack: React.js, PostgreSQL, LangGraph, Gemini 2.5 Flash, Gemini Vision, SQLAlchemy, WebSockets, OpenStreetMap

EVIDEX — Agentic AI Event Reconstruction System 09/2026 - Present

- Developed a multimodal multi-agent system that correlates CCTV, images, audio, GPS, and documents to reconstruct probable event timelines, detect contradictions, and provide explainable, evidence-backed conclusions.

Tech Stack: Gemini 2.5 Flash, Gemini Vision, RAG, React.js, PostgreSQL

ACHIEVEMENTS & CERTIFICATIONS

- GoogleStudentAmbassador —2026
- Hack Forge Kalam 2025 — Runner-Up: Built a machine learning model to solve an assigned challenge problem, placing as Runner-Up among competing teams.
- Pitched and presented at TN Startup Summit 2025
- Python for Data Science, AI and Development — IBM (Certification)
